

## **IMPORTANT NOTICE IN 042/18**

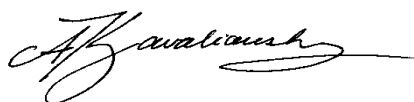

### **LEVEL 3 ACCREDITED SERVICE PROVIDERS**

## **RECRUITMENT OF ADDITIONAL CONTESTABLE WORKS ENGINEERS - CWES**

I am pleased to advise that after continued challenges to fill vacancies for CWEs from internal advertising the Company has broadened its recruitment strategy by advertising externally.

It should be noted that it has been a continual challenge to attract and maintain sufficient staff with the required skills and competencies to meet the demand for certification but over time we have increased staff and made the position more attractive.

Whilst our Company advertises through SEEK we also welcome any applications directly through the careers section of our Corporate Website as per the attached advertisement.

Tony Kavaliauskas  
Manager Network Connections  
24 October 2018

## **CONTESTABLE WORKS ENGINEER**

### **2 YEARS FIXED TERM**

Endeavour Energy is one of Australia's largest energy distributor, or 'poles and wires' business, responsible for the safe and reliable supply of electricity to 2.4 million people in households and businesses across Sydney's Greater West, the Blue Mountains, the Southern Highlands, the Illawarra and South Coast.

We are 50.4 per cent owned by an Australian-led consortium of long-term investors within the private sector operating the network under a 99 year lease. The remaining 49.6 per cent is held by the NSW Government.

Our customers are central to our plans. We're committed to delivering better value for customers by reducing our costs, without compromising safety or services.

### **ABOUT THE ROLE**

Our Network Connections Branch is seeking qualified and experience electrical engineering professionals to join their design review team at Hoxton Park.

Working within a team environment, this role is primarily responsible for providing high level technical advice and leadership on customer connection works to external clients, their consultants, project managers and Level 3 designers.

This will entail a solution oriented approach which includes assessing, recommending a supply method and certifying the Level 3 electricity network design to ensure that the proposed scope of works meet the clients' development needs, is safe, maintainable, sustainable and complies with Endeavour Energy's network standards and satisfies all stakeholders and community expectations.

### **ABOUT YOU**

With a Bachelor's Degree in Electrical Engineering and extensive knowledge in the Electrical Transmission and Distribution industry, you will have demonstrated leadership experience coupled with a high level of technical knowledge applicable to the role.

An effective communicator with exceptional interpersonal skills, you demonstrate the ability to engage with a diverse range of stakeholders at all levels, both internal and external; and a strong commitment to facilitate the delivery of outcomes to meet customers' demands.

Key to your success in this role will be your knowledge of the regulatory frameworks for the electricity supply industry and knowledge of electrical engineering principles including all relevant Australian Standards on electricity and distribution network, as well as Service Installation Rules of NSW.

In addition to the above, you will need to meet the following criteria:

**Essential Criteria:**

- Licences/Tickets
- Driver Licence Class C
- WorkCover OH&S General Induction

We offer excellent working conditions and an attractive salary range (total package) of between \$145,500 to \$157,550 per annum for the right candidate.
