About us

We are All Round Supplies, your one-stop shop for electrical infrastructure products.

With over 20 product categories and thousands of items in stock, we make it easy for you to procure the exact products you need for works on the electrical distribution grid across the country. All Round Supplies has been Australia's leading supplier of electrical infrastructure products since 2000. We are led by a dedicated team of ex-electrical contractors with over 25 years of knowledge and experience. We speak your language.

Our Values

We are one company, one team.

We are successful because we are passionate.

We add value to our customers.

Management by fact.

We act with integrity.

Safety is paramount.

Our Vision

All Round Supplies will be the first-choice supplier to our customers, a partner of choice for our suppliers, and an employer of choice for our people.

Our Mission

To provide utility contractors throughout Australia with the widest range of electrical infrastructure products, fostering long-lasting client relationships and committing to a strong supply-chain and business delivery ethic.

What we do

Wholesale

Wholesale supply of a comprehensive range of products for the electrical/energy industry, including exclusive items. (Did we mention competitive prices?)

Online and over-the-phone order

Buy common-use/day-to-day items online and over the phone.

Expert assistance

You can call up and speak with a salesperson who understands your industry.

Full-scale project quotes

We also do in-depth quotes on full-scale projects/tenders.

Why us?

We have worked as electrical contractors ourselves.

The headache and frustration caused by trying to get the right materials **QUICKLY, CHEAPLY AND RELIABLY** is what had us start All Round Supplies in the first place.

Don't spend more money than you have to. Avoid accidentally ordering the wrong product. Stay clear of suppliers with products that are not in stock, expensive deliveries that take too long and endless back and forth.

We feel your pain and we're here to help.

Here is what you can count on from us:

Completeness

We can quote the whole shopping cart. No more hunting around and juggling deliveries from multiple suppliers.

Speed

We deliver your products to you when and where you need them – fast. So you can meet your deadlines.

Technical Expertise

Not entirely sure of the best items for the job? We can help you choose the right products for your project and even preempt what you will need down the track.

Our experts can recommend the **CORRECT/ APPROVED** item. Avoid the headaches that result from accidentally using non-approved items.

Customised Delivery

Take advantage of our range of delivery options. From packaging your next delivery in a specific way, to scheduling the delivery of your order.

Get the items you need, precisely when you intend to install them.

Competitive Pricing

We strive to give you the best available prices every time.

Our products

All Round Supplies is the leading distributor of electrical infrastructure products in Australia. We are a one-stop-shop for project, safety and tooling products, providing our customers with the most extensive range of products in the industry, excellent value and knowledgeable service.

Overhead products:

We stock a comprehensive range of overhead construction materials, including:

Bare conductor, CCT and HV ABC fittings

Cable

Fasteners and metal brackets

Fuses

Guy/stay equipment

LV ABC fittings (HSCs, IPCs, TOCs, fuseholders, brackets, hooks, clamps, sleeves, end caps)

Insulators and surge arrestors

Pole transformers

Power poles and crossarms

EARTHING

GUY/STAY EQUIPMENT

LV FITTINGS

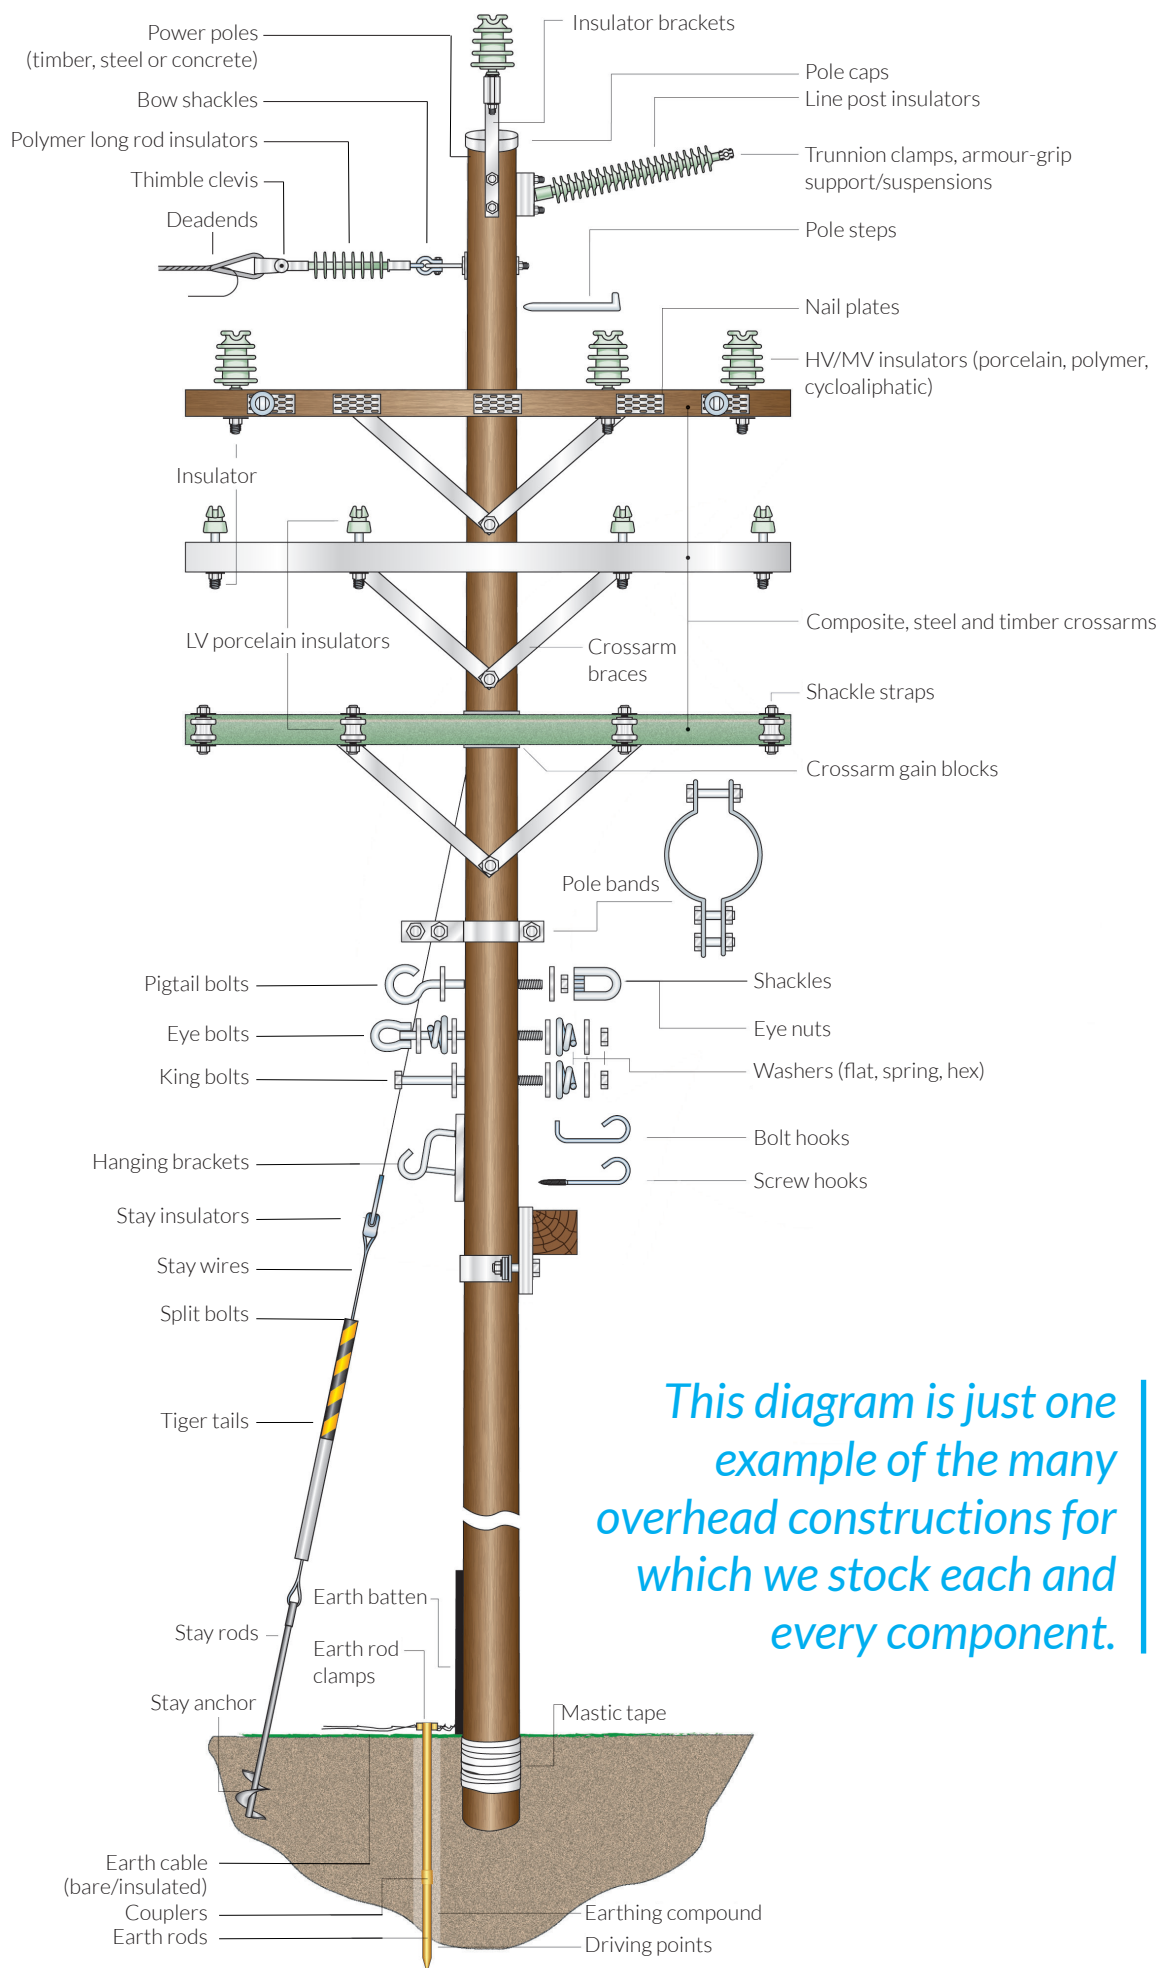

OVERHEAD, SWITCH,
DOF & RECLOSER

POLE TRANSFORMERS

SURGE ARRESTORS

This diagram is just one example of the many overhead constructions for which we stock each and every component.

Our products

Underground products:

We also stock a comprehensive range of materials for underground projects, including:

Cables and cable clamps

Conduits, hard cover, glues and lubricants

Earthing materials

Ground transformers and switchgear

Heatshrink gloves, caps and tube

Joints, terminations and elbows

Lugs, links and sleeves

Kiosk substations and switching stations

Lv terminations

Pillars, bases, pits and lids

Waterproof IPCs and submersible fuses

We also stock every tool and accessory you could possibly need to install your job, from covers and clips to labels and glue, and anything else you can think of!

Safety Products

We're extremely proud of our range of safety gear and PPE. Everything we sell is specifically tailored to electrical contractors across the country.

We stock one of the best ranges of arc-rated shirts, pants, jackets, face-shields and hardhats – all approved and, in many cases, required on many utility networks.

Our safety range also covers insulated electrician's gloves and sleeves, and everything you might need for fall protection, rescue kits and first aid, general body protection PPE, insulated drapes, mats and tiger tails, and general site safety items like cones, safety tags and barrier mesh.

Electrician's tools

We've curated the most professional, industry-specialised range of electrician's tools in Australia.

No matter what your project is, we've got the tools to get the job done: ratchet spanners and separators for LV ABC installations; cable and conduit cutters; 1000V insulated tools; linesmen's tools, cable prep strippers and scorers; electrical testers and detectors; URD tools; crimping tools; cable pulling and earthing tools.

Image: Ausgrid photos

ARSEMBLIES

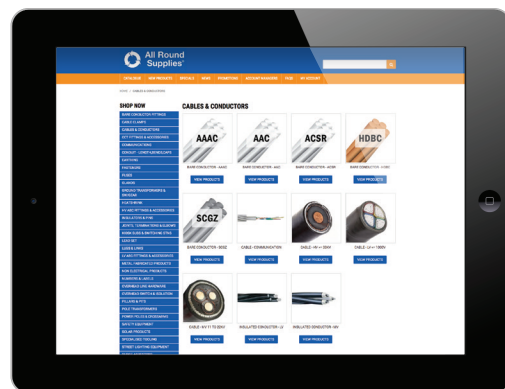

We've combined the components needed for many utility constructions into kits, or 'ARSEMBLIES'. This saves you the time and energy that would go into sourcing each individual, utility-approved component.

The benefits:

1. You only use one stock code for an entire construction type, to make ordering easier.
2. Only utility-approved materials are included for your peace of mind.
3. Each construction is engineered to meet utility construction design standards.
4. ARSEMBLIES reduce the chance of forgetting materials in the field.
5. Multiple kits can be packaged to meet product-specific requirements.
6. ARSEMBLIES include all of the materials that are not variable - order these separately according to the needs of your job.

Complete online VIP catalogue

The ARS Online Catalogue is our online ordering and quoting system, where you can find our full range of products. Access to this resource is exclusive to our premium accounts – those who meet a certain spend with us each year and purchase from across a range of our product categories.

ELECTRICIAN'S GLOVES

Our electrician's gloves are manufactured from 100% natural rubber. They are intended to be used exclusively for working with high voltages in potentially dangerous work environments. Each set of gloves is subjected to physical and electrical tests to ensure that they exceed EN 60903 requirements, the standard specification for Insulating Rubber Working Gloves.

DESIGNED TO: RESISTANCE TO PUNCTURE, CUT, TEAR, AND PERFORATION. RESISTANCE TO OIL, GREASE, AND ACID. RESISTANCE TO WEAR. RESISTANCE TO ELECTRICAL SHOCK.

INNER & OUTER

Leather protectors should be worn with rubber insulating gloves to prevent mechanical damage under most circumstances, unless the diversity required for the task requires that rubber gloves are worn alone.

HOW TO MEASURE

Measure your hand by wrapping the tape at the top around your palm at the point widest to the right.

The palm length is the distance from the thumb to the pinky. The wrist length is the distance from the thumb to the pinky. The wrist length is the distance from the thumb to the pinky. The wrist length is the distance from the thumb to the pinky.

GLOVE AIR CHECK TOOL

Use the Baller Engineering air check tool to ensure your rubber gloves are in one piece, and the cuff-up to top of inside and bottom for checking air which will indicate a hole or puncture in the glove. In the event of any leakage, deterioration or wear, destroy gloves immediately.

Our unique set of catalogues has been designed to make it simple for customers to identify and order the right products while on-the-go.

MyShopNGo

We have a wide selection of our extensive product range available for quick and hassle-free shopping 24/7 at our MyShopNGo online store.

MyShopNGo provides electrical, safety, tooling and hardware products for anyone working on a utility network.

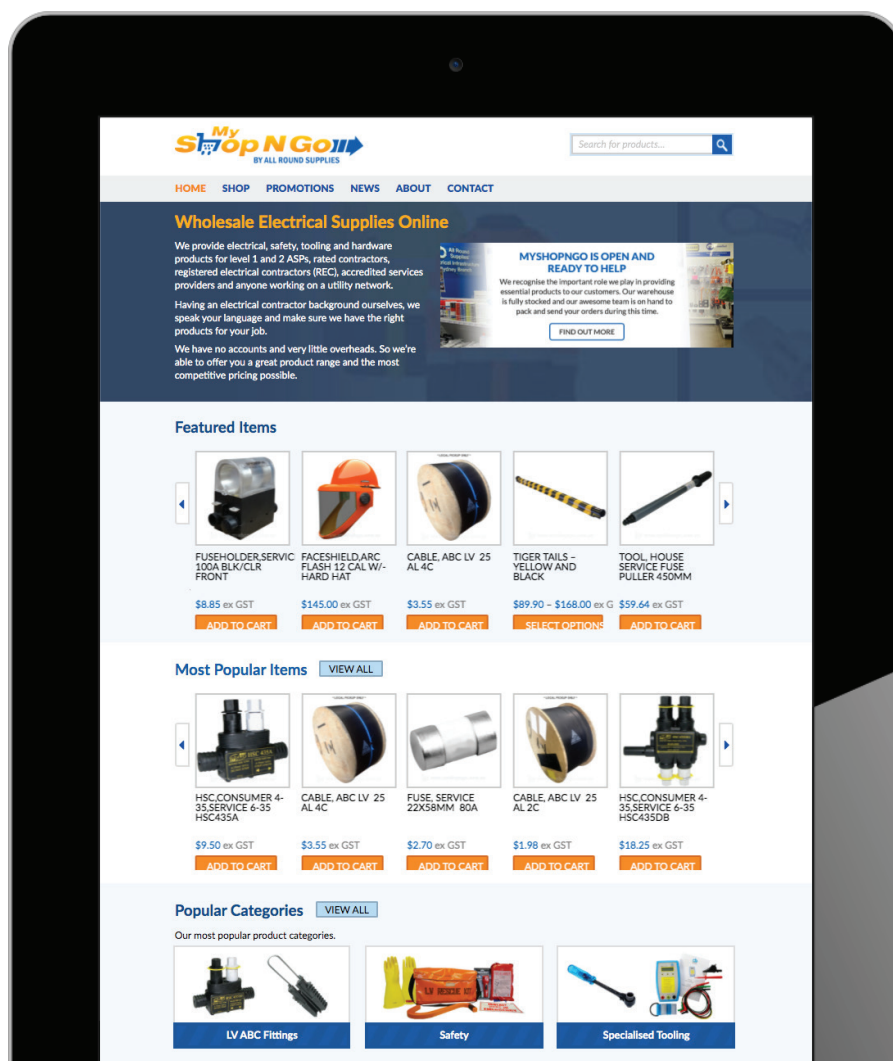

With an already-established product range, no accounts and very little overheads, we're able to offer the most competitive pricing to the market.

YouTube

You can find a huge selection of product walk-throughs and how-to videos on our YouTube channel. With over 2000 subscribers and counting, it's well worth a look.

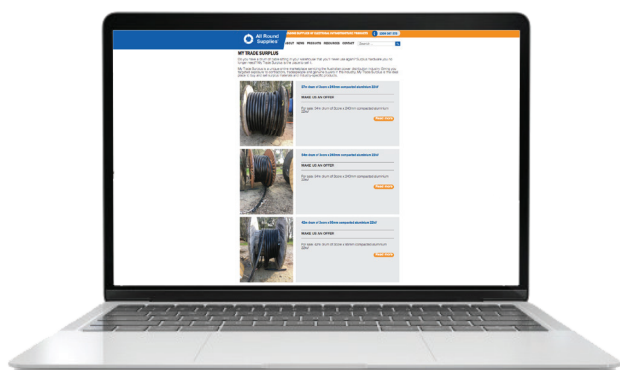

Faster and more convenient than signing up for an account, MyShopNGo offers premium products at competitive prices, delivered straight to your door.

My Trade Surplus

My Trade Surplus is like 'GumTree' for the power distribution industry. You can buy or sell surplus materials and industry products.

Hosted on the ARS webpage, My Trade Surplus gives you targeted exposure to contractors, tradespeople and genuine buyers.

Delivery options

We offer a range of delivery and pick-up options, from scheduled daily delivery runs to surrounding areas, to courier services and direct-to-site deliveries where experienced handling is required. We can also stage the delivery of your order to suit your project.

Here for you

We have a can-do attitude backed up by more than 30 years experience delivering complete, cost-effective solutions for electrical projects.

Having an electrical contractor background ourselves, our team offers a unique blend of technical expertise and customer support.

We've been told this combination of talents uniquely supports our customer's needs. We speak your language, ask the right questions, and make sure we have the right products for your job.

One thing we're especially proud of is our unwavering commitment to only recommend and supply appropriate, utility-approved materials if you're working on a utility network.

We fully understand the importance of the engineering and approved-material process (and how quickly standards and products can change) and we're committed to keeping up with these changes for you.

Our branches

All Round Supplies has branches in Sydney and Melbourne with more than 9000 product lines available and over 2,300 stocked on the shelves at any given time. We're proud to say that our customers can rely on us to consistently deliver the products they need, when they need them.
