A GLOBAL BUSINESS BUILT ON
QUALITY, INNOVATION, SERVICE
...AND REAL FAMILY TIES

Welcome to Slingco, a world-leading supplier of cable grips and wire rope. Founded by our father, Chris Dykins, more than 40 years ago, Slingco remains a family-owned business but has evolved into an expert design and manufacturing operation, producing high quality cable grips, wire rope assemblies and more - products that are renowned for high performance in quality-critical applications.

Slingco operates out of regional bases in the UK and USA, but you'll find our products around the world, making heavy-duty cable and conductor installation and support a whole lot easier for people working in industries as varied as oil and gas, marine and offshore, public utilities, civil engineering, aerospace, transport, the military, performing arts, vehicle building, construction and more.

You can't make mistakes when you're dealing with products like ours. Too much depends on them. That's why we're obsessive about quality and innovation in design and manufacturing, and why nothing leaves our hands that isn't 100% dependable.

Because we understand exactly what your operation needs, we also know cost is a factor. We keep our prices realistic and hold a vast range of stock for fast – even same day – delivery.

We're brothers, partners and the driving force behind Slingco, but we're only a small part of the whole picture. We've got a fantastic team of skilled people who share our obsession with quality and great service. We're proud of every one of them.

Together, we're going to carry on developing outstanding products. We're going to carry on getting them out to you in record time. And we're going to carry on being the sort of company it's a pleasure to deal with.

IMPORTANT TECHNICAL INFORMATION

Cable Pulling Grips and Cable Support Grips	49
Single and Double Eye Cable Grip Instructions	50
Lace Up Cable Grip Instructions	51

A TYPE - HIGH STRENGTH CABLE GRIP

The strongest grip we produce; can be used for metal wire and synthetic rope pulls. Perfect for overhead transmission and distribution line pulling or any applications with heavy load ratings, e.g. gas, electric railroad, rigging lines and construction pulls. When pulling synthetic rope use a Slingco Feed Tube (see below) to make rope insertion a breeze. To avoid the effects of torsion a line pulling swivel that rotates under load should be used. Galvanised Steel and colour coded for ease of identification.

FEED TUBE

Due to the tight construction of the A Type cable grip, we recommend using the Slingco Feed Tube when inserting cable or rope into the grips. For ease of use, our feed tubes are colour-coded to match the A Type Cable grip.

Slingco Part No.	Tube to fit rope diameter		Feed tube length		Matches Slingco cable grip part no.	Cable grip colour

MU TYPE - HIGH STRENGTH CABLE GRIP

This grip's triple weave construction is ideal for heavy loads. MU cable grips are colour coded for ease of identification. Perfect for stringing overhead transmission and distribution lines and heavy-load pulls of any kind. Use with bare or insulated cable, conductor or wire. The flexible eye connects with Slingco line pulling swivels for trouble free pulling applications. Made of Galvanised Steel.

The HD, MD and LD type form a range of conductor grips that are quick and easy to attach and remove, in sizes from 8mm to 48mm, with MBL up to 24,000kgs and WLL 8,000kg. They are suitable for all common conductors, e.g Horse, Lynx, Upas, Zebra and Araucaria plus earth wires OPGW. The flexible eye connects with Slingco line pulling swivels for trouble-free pulling applications. Made of galvanised steel.

OS TYPE - OFFSET EYE GRIP

Similar to the SE Type single eye cable grip, but for when offset positioning is required. Excellent for pulling slack out of lines that have been pulled. May also be used for removing underground cables when end of cable is available.

LU TYPE - LACE UP GRIP

Ideal for pulling light to medium loads; the LU-type is fitted to the cable being pulled by stitching it together, like a football. Mainly used where a 'typical' cable grip can't be fitted over a connector at the end of a cable. For use in pulling when the end is not accessible. The LU Type is wrapped around the cable, then closed with the wire lace provided. See Lace Up instructions on page 51.

FLEXIBLE & THIMBLE EYE GRIP - SINGLE EYE

Designed to fit the typical European range of cables, and with a longer lattice length, these grips are ideal for pulling medium to heavy loads. Made of galvanised steel, this grip has a flexible eye construction – and is also available with a reinforced thimble eye.

R TYPE - ROTATING MULTI-WEAVE GRIP

Like the MU type, the rotating eye grip has a triple weave construction and is colour coded for ease of identification. The steel forged revolving head is ideal for connecting to Slingco swivels. Warning: The Slingco rotating eye does not revolve under load and does not replace the use of a line swivel. Please see page 29 for swivel and grip match-up and safety and technical information. Made of galvanised steel.

RT TYPE - ROTATING EYE DOUBLE WEAVE GRIP

Double weave construction for medium to heavy pulling applications in underground installations. Additionally its steel forged revolving head is ideal for connecting to Slingco swivels. Warning: The Slingco RT Type Rotating Eye Grip does not revolve under load. The rotating eye does not replace the need for a swivel. Please see page 29 for swivel and grip match-up and safety and technical information.

REINFORCED EYE UNDERGROUND GRIPS

This line of grips are specially designed for underground applications. The eye is enclosed in an aluminium tube which provides added support when running within conduit and trenches. Plus these underground pulling grips are made from coated airline wire for added strength and flexibility.

Now with expanded range capacity use one grip for a wider range of diameters. Plus the expanded range allows for easier installation on conductor or any cylindrical object. As with all pulling applications Slingco strongly recommends banding. See grip installation instructions on page 50.

SPLICING GRIP - ROTATING SWIVEL LINK

Slingco Rotating Swivel Link Grips are perfect for stringing replacement wire and cable on equipment and in drilling or rigging systems. Not recommended for use in overhead stringing applications. Use the existing cable as a pull wire to string the replacement cable. These grips are available with differently sized grips for each side. Call for assistance in selecting the proper grip. Link opens for easy installation and adjustment. Made of galvanised steel.

TRI & QUAD PULLING SLING

This staggered pulling sling is designed to allow the pulling of multiple conductors at the same time while minimizing the overall diameter of your pulling bundle. These pulling slings come in a three leg or four leg versions. One should use a swivel for each leg and at the head of the sling to release torsion and allow the conductors to rotate freely. The suggested swivels are listed with each model.

OPEN ENDED GRIP

Ideal for joining two cables to form a continuous loop. Typical application: replacement of lift cables, where the old cable would be attached to the new one, and the cable then fed around with ease. Also used to temporarily splice cable and conductor where torsion forces are NOT an issue. Torsion should be released prior to splicing. Where torsion is present a swivel and two grips should be used.

SLINGCO NON-METALLIC ARAMID CABLE GRIPS

FOR PULLING CABLE IN MANY INDUSTRIAL & COMMERCIAL PROJECTS

Slingco's Non-Metallic Aramid Cable Grip Features:

- Break loads similar to steel cable grips
- Lightweight
- No more frayed grip wires
- UV Resistant and strong enough to last in salt water, pollutants, and underground
- We can create custom grips to meet your specifications

Slingco's line of Non-Metallic Aramid Cable Grips are ideal for use in fiber optic cable installation operations, offshore applications, or for a multitude of uses in the utilities industry.

These grips are made of a high-strength, non-metallic aramid fiber, with UV protective coating, and now feature an improved weight to break ratio. They are suitable for pulling both single cable and multiple cable bundles.

Thanks to the non-metallic material, these grips are easy to work with even without gloves. The woven mesh material also offers

a non-metallic, non-conductive alternative to steel grips.

We have many different styles of Non-Metallic Aramid Cable Grips for your project, such as Single Eye, Double Eye, Offset Eye, Lace Up, Mining Grips, and our new Single Eye Double Weave Grips made of ultra flex aramid material. We can also work with you to customize an Aramid Cable Grip to match any particular project specifications.

Call your Slingco Account Manager today and they will help you select the right grip for your project!

Single Offset Eye Lace Up Non-Metallic Cable Grip

Double Offset Eye Non-Metallic Cable Grip

SUB-SEA AND MARINE GRIPS

These speciality grips are extremely heavy duty and suitable for large underwater pulls, plus other applications in the oil and gas industries. Galvanised steel construction for heavy duty large diameter pulls. Applications include underwater cable installation. Available in single eye, double eye lace closing and double eye. Sizes range from 4 inches to over 20 inches. Manufactured to order.

WIND TURBINE SUPPORT GRIP - HEAVY DUTY THIMBLE OFFSET EYE

Slingco has developed a range of cable grips tailored for the renewable energy sector for use in:

- Cable installation – on-shore and off-shore
- Cable support inside wind turbines
- Cable management

For wind turbines, special features have been adapted to allow for minimal contact with the actual cable while still allowing excellent working loads and cable support.

The Slingco Wind Turbine Support Grip is manufactured from 316 Stainless Steel and provides cable support and control inside the wind turbine. It features rounded copper ferrules and offers reduced cable contact for high vibration environments. Custom grips can be adapted to meet any requirement.

SPRINGS

Support the dead weight of cables. Used in conjunction with support, service or bus drop grips. These safety springs relieve strain by dampening pull vibrations. Available in two working load strengths. The safety spring helps prevent pull outs. Avoid downtime and accidents from disconnected cables.

Can be used with any strain relief support grips. Attach grip eye to bottom of spring.

Slingco Part No.	Working Load (lb)		Diameter		Spring Length	
	lb	kg	in	mm	in	mm

HEAVY DUTY CABLE SUPPORT GRIPS

Heavy Duty support grips made from stainless steel are perfect for supporting heavier cable, conduit or any other cylindrical object. Often used by Utilities and Contractors to support cables transitioning from overhead to underground. One may support multiple cables in one grip. The overall diameter of the cable bundle should fit within the listed range.

DELUXE CORD GRIPS

Deluxe Cord Grips provide strain relief and bend support for cables running into machinery and connection boxes. Select the deluxe grip that fits the NPT size being connected to. Available with Straight Male, 90 degree Male, 45 degree Male and Straight Female connections. The wire mesh grip is sized to provide bend support and pull out resistance for the cable range listed.

I-GRIPS

Strain Relief mesh grip with crimped eye connectors for easy attachment to cord clamps. Eye connectors allow for attachment with screws for secure placement and hold. Made of galvanised wire these grips come in a variety of cable ranges. When installed relieves strain from bend angle and secures cord from pull out potential. Connectors made of aluminium.

HOSE WHIP RESTRAINT

The strong steel cable prevents hose-whip accidents in the event of hose or coupling failure.

Easily fitted spring loaded loops grip the hose firmly.

ANTI ROTATIONAL DEVICE

The device prevents the cable from twisting as it travels over pulling blocks. Left uncontrolled, the optical cable's delicate glass fibres could be permanently damaged during installation.

- Stops cables from twisting as they pass over pulling blocks
- For use with fibre optic and OPGW cable
- Prevents irreparable damage to delicate fibre optics caused by cable twists during installation
- The ARD has weighted attachments that hang down while stringing, keeping the ARD vertical to stop cable rotation
- ARD attachments collapse in line, enabling them to travel easily over pulling blocks

LINE PULLING SWIVELS

Swivels designed for use in stringing high tension wires for electrical transmission and distribution.

LINE PULLING SWIVEL – STANDARD ENDS

LINE PULLING SWIVEL – BULL NOSE

Swivels are important in pulling when the lines develop torsion during the installation. This torsion must be released. Use of a swivel will release torque and prevent it from reaching dangerous levels, which can cause damage to the cable or grip.

Slingco also offers a 'bull nose' style swivel designed for underground and overhead applications.

All swivels are stringently quality tested and inspected to ensure optimum performance and reliability.

SAFETY NOTE: All Slingco Line Pulling Swivels are designed for straight line pulling and will not support side loads as would be encountered traveling over a bull wheel. Swivel selection should be based on pulling line diameter, grip size, opening dimensions, pin sizes, working load, and sheave groove diameter. Swivels are not designed for general lifting.

DIRECTIONAL DRILLING SWIVELS

Slingco Directional Drilling Swivels are designed to counter rotational forces caused by boring equipment used in underground pulling and drilling applications. Grease nipple included for removal of dirt and contaminants. Made of carbon steel and zinc passivated for durability. Hex pins. Quality tested and inspected to ensure optimum reliability and performance.

BRIDGE TYPE CABLE LAYING ROLLER

Made of steel with zinc plating for general purpose cable installation work in trenches or over rough surfaces. They are suitable for power, telecoms and utility installations, and can bridge existing cables or conduit in trenches or ducts.

The Compact Cable Roller is for use in narrow trenches and/or in confined areas. Contact Slingco if you have custom roller needs.

Bridge Type Cable Roller

Slingco Part No.	Base Footprint in (mm)	Height to top of roller in (mm)	Handle height in (mm)
ZGP2395	12 x 9.5 (305 x 240)	7.125 (180)	10 (255)

* Drawing measurements in mm

EDGE MOUNT MANHOLE LEAD-IN CABLE ROLLER (HEAVY DUTY)

The manhole cable roller leads the cable from the drum into the jointbox/manhole or the winch bond out of the manhole.

- Heavy duty tubular steel construction
- Suitable for cables up to 130mm
- 3 x 110mm diameter steel roller* fitted with sealed precision roller bearings
- Zinc plated
- Weight: 10 Kg

* The Diablo Rollers can be substituted with a heavy gauge 89mm tubular Steel Roller fitted oil impregnated maintenance free bushes for use with the heavier cables.

Slingco Part No.	Base Footprint in (mm)	Height in (mm)
ZGP8209	22 x 8.25 (560 x 210)	16.34 (415)

EDGE MOUNT MANHOLE LEAD-IN CABLE ROLLER (LIGHT DUTY)

The manhole cable roller leads the cable from the drum into the jointbox/manhole or the winch bond out of the manhole. The roller has 2 hooks for location on the edge of the manhole.

- Heavy steel section construction
- 76mm diameter aluminium roller*
- Fitted with oil-impregnated maintenance-free bushes
- Sealed precision roller bearings
- Zinc plated or powder coated finish
- Weight 3Kg

*The aluminium roller can be substituted with a solid steel roller when using wire winch bond thus preventing damage.

Slingco Part No.	Base Footprint in (mm)	Height in (mm)
ZGP8210	10 x 6.7 (255 x 170)	5.7 (145)

HEAVY DUTY 214MM STRAIGHT LINE CABLE ROLLER

The diablo is machined with a 107mm radius giving a maximum capacity of 214mm diameter.

- Heavy duty folded frame straight line roller
- Aluminium diablo roller with 78mm radius
- Sealed roller bearing and 20mm shaft
- Galvanised finish
- Weight : 7Kg

Slingco Part No.	Base Footprint in (mm)	Height in (mm)
ZGP8268	11.81 x 7.87 (300 x 200)	6.1 (155)

HEAVY DUTY TRIPLE CORNER CABLE ROLLER

This is a heavy duty corner cable roller for use in most cable laying applications. They can be used singularly or linked together using link pins to form a full bend. All products in the bend roller range have the same link points to facilitate various bend/roller configurations.

- Heavy duty corner roller made from tubular sections
- 3 x 110mm diameter large waisted steel rollers*
- Sealed roller bearing fitted
- Zinc plated finish
- Universal link pin mount positions
- Weight 8.5Kg

* The diablo rollers can be substituted with a heavy gauge 89mm tubular steel roller fitted with oil impregnated maintenance free bushes.

Slingco Part No.	Base Footprint in (mm)	Height in (mm)
ZGP8269	16.4 x 12.6 (410 x 320)	11.61 (295)

CABLE DRUM ROTATOR

This is a compact light weight Cable Drum Rotator. Drums are simply rolled up the ramp on to the adjustable rollers to allow it to spin freely.

- Pressed steel construction
- Ideal for where space is limited.
- 60 mm diameter zinc plated rollers
- Sealed roller bearings fitted
- Spring loaded shafts for easy replacement/ adjustment
- Capacity 200 Kg
- Max / min drum size 800 / 300 mm
- Drum Width 450 mm
- Zinc plated finish
- Weight: 10.5 Kg

Slingco Part No.	Base Footprint in (mm)	Height in (mm)	Max Capacity lb (kg)
ZGP8267	19.68 x 20.66 (500 x 525)	4.72 (120)	440 (200)

C CONNECTORS

Use to connect rope, swivels and other objects.

CONNECTORS: 90°, ROPE TO ROPE, ROPE TO SWIVEL

Use to connect rope, swivels and other objects. With high strength pins and smooth rollers you can safely connect rope without fear of fraying or damage. Use the convenient 90° connectors to link wire and other non-rope items. Connectors have high strength hex pins. The Rope to Rope connector has two rollers to protect rope from becoming frayed.

POLE BAND SYSTEM

The Slingco Pole Band System includes bolt clamps and mounting plates and 19mm (0.75") or 31.75mm (1.25") banding. Packages with different band lengths make this system flexible for varying pole sizes. Just measure the circumference of the pole and add a minimum of 152.4mm (6") and select the next size up. Securely mount hardware to cylindrical or square wooden, metal or concrete poles.

The system includes aluminium hardware extrusions, bolt hardware and pre-cut lengths of stainless steel banding. The system is easy to attach and tighten onto poles. The optional mounting plates allow quick attachment of hardware.

Extrusions and mounting plates available separately for use with rolls of banding cut to length in the field.

POLE STAPLES

Slingco Staples are used to securely hold grounding and bonding wires while insulating the wire from the staple. The insulation minimizes TV and Radio Frequency Interference by preventing sparks. The insulator ensures that current cannot flow into the staple that could cause fires on the pole. The insulator also acts as a barrier to corrosion caused by contact with ground wires.

- Securely hold grounding and bonding wires
- Insulated inserts
- Barbed and non-barbed styles

Slingco Part No.	Description	For Use With Wire
ZMI6326	30mm (1.5") x 6.35mm (0.25") x 3.75mm (0.148") Galvanised barbed wood staple with TVI insulator	#6, #8 & #10 solid CU wire

TOOLS, BUCKLES AND BANDS

FOR QUICK AND EFFICIENT BANDING OF CABLE GRIPS, HOSES AND MORE

Slingco Banding Tools deliver a fast and easy way to install banding clamps. Designed for fast and efficient installation of steel bands for cable grips, hoses and many other applications, their drop-forged construction and comfortable design makes them quick and easy to use and guarantee a long and useful tool life.

We offer three different tool options, with bands and buckles available for each (order separately). See opposite for the bands and buckles suited to each tool type.

In addition to our range of steel bands available from stock we can also manufacture custom sizes if required. Please call with your requirements.

Slingco Fast Banding Tool

WITH PRE-LOOPED BANDS FOR QUICKLY SECURING GRIPS AND OTHER SIMPLE BANDING APPLICATIONS
Our Fast Banding Tool uses pre-looped punch-style bands for quick and secure banding of cable grips, hoses and other cylindrical items.

Slingco Light Duty Banding Tool

FOR UTILITY POLE AND OTHER LIGHT DUTY POLE BANDING APPLICATIONS
Featuring a built-in cutter with PVC coated handle for comfort, and a sliding block assembly with spring loaded lever. Operates on band widths 3/8" to 3/4" and thicknesses up to 0.030".

Slingco Heavy Duty Banding Tool

FOR UTILITY POLE AND OTHER HEAVY DUTY BANDING APPLICATIONS
Featuring a built-in cutter and a sliding block assembly. Operates on band widths 3/4", 1", and 1-1/4" and thickness of 0.044".

Note: Slingco recommends double banding the ends of cable grips.

FAST BANDING: PRE-LOOPED BANDS FOR QUICKLY

SECURING GRIPS AND OTHER SIMPLE BANDING APPLICATIONS

Use pre-looped punch style bands to quickly and securely band cable grips, hoses or other cylindrical items.

The bands are pre-looped through the buckle to slide over the end of the item being banded. Just tighten the band using the Slingco Punch Banding Tool then, when the band is tight, just punch the head of the tool and snip off the extra banding. Simple!

The sizes opposite refer to the inner loop diameter of the band. Select the size that will comfortably fit over the item being banded.

Open End Band – non pre-looped 201 SS 5/8" wide band with attached buckle. Includes punch style buckle. Use as single loop for larger diameter or double looped for smaller diameters and added strength. Maximum diameter for single or double loops is listed.

LIGHT DUTY POLE BANDING APPLICATIONS

Use Slingco 3/4" wide 201 Stainless Steel, or the 1/2" wide 316 Stainless Steel, banding system to secure cables and other items to Utility poles, Light stands or other structures. The Light Duty Banding Tool allows you to easily tighten and secure any length band loop.

Slingco offers rolls of 3/4" and 1/2" wide banding material in 100 foot lengths. These 100 foot band rolls come in two convenient packages – standard stack-and-store cardboard packaging, or an easy to carry red plastic tote for the 3/4" and a blue plastic tote for the 1/2".

The buckles used to secure these bands are made of 201 Stainless Steel and designed for 3/4" width bands, and 316 Stainless Steel designed for 1/2" bands.

Banding tool					
Slingco Part No.	Description				
CPC8748	Operates on band widths 3/8" to 3/4" and thickness up to 0.030". Tool has a built in cutter with PVC coated handle for comfort and sliding block assembly with spring loaded lever.

HEAVY DUTY BANDING APPLICATIONS

Use the Slingco 1-1/4" 201 Stainless Steel Banding system to secure cables and other items to structures and poles where extra strength hold is required. The Heavy Duty Banding Tool allows you to easily tighten and secure any length band loop.

Perfect for use with concrete utility poles. The extra width of this band provides stronger tensile strength than the 3/4" band as well as a wider holding surface. Useful in many application environments including Utility, Marine and manufacturing where securely attaching cables, hoses or tubes onto a cylindrical object is needed. 100 ft. band roll comes in easy to stack and store cardboard box.

Giant buckles are made of 201 Stainless Steel and designed for use with 1-1/4" wide bands.

60 TON HYDRAULIC CRIMPING TOOL

Slingco's Hydraulic Crimping Tools are designed to crimp sleeves and lugs on ACSR and ACAR transmission & distribution cables using dies that meet the standards of the utility industry. Our crimping tools are ideal for use in constructing substations and transmission lines.

The Single-Acting Crimping Tool uses hydraulic pressure to advance the ram into position, and an internal spring to return the ram to the original position. The Double-Acting Crimping Tool advances and returns the ram using hydraulic pressure alone, eliminating the possibility of the ram sticking or becoming jammed.

Our Hydraulic Crimping Tools come in a steel carrying case, and are lightweight and portable. Our crimping tools accept Slingco S60 Dies, or any shell-type dies used with Alcoa or Burndy 60-ton crimping tools.

- Accepts Slingco, Burndy L and Alcoa 6000 Series dies
- Steel Carrying Case Includes Ground Stand
- Lifting eye for hoist work
- For Crimping ACSR and ACAR transmission and distribution cables

100 TON HYDRAULIC CRIMPING TOOL

Slingco's 100 Ton Hydraulic Crimping Tool is ideal for use in constructing substations and transmission lines. This tool is designed to crimp sleeves and lugs on ACSR and ACAR transmission cables using dies that meet the standards of the utility industry.

- Accepts U or shell type dies
- Steel Carrying Case
- Large handles for easy carrying
- Easy die installation

The TCR0849 comes in a single-action configuration but can be converted to double-action functionality.

Crimping Range

- Copper: Up to 2.5" OD Sleeve
- Aluminium: Up to 3" OD Sleeve
- Steel: Up to 1.25" OD Sleeve

Comes with steel carrying case.

MECHANICAL CRIMPING TOOLS

Slingco's Mechanical Crimping Tools have been created to complete the variety of utility distribution service connections that need to be made on the line, pole, and home. Our crimping tools have been designed to provide reliable crimps installing full-tension or non-tension connectors.

Slingco's Mechanical Crimping Tool's 'D3' groove allows 'W' style die inserts for installing taps, splices, and terminal connectors. The 'W' die inserts lock securely and easily into place with the positive lock, spring-loaded die buttons. Slingco also offers a Mechanical Crimping Tool that accepts Kearney type dies.

Our Mechanical Crimping Tools also have ergonomic handles for comfortable use and maximum leverage when making critical connections.

REEL LIFTER

The Slingco Reel Lifter is a high capacity, compact unit that allows users in the utility construction industry to safely load, transport, and dispense wire and/or cable on-site. It is also used in many industrial applications to make moving and relocating reels in a warehouse easy. Now a task that normally used a team of three or four people can be done with just one, allowing the crew to operate more efficiently!

Makes handling large cable reels quick and easy, on-site or in warehouses.

- Rugged construction to lift and unpend reels
- Easy rotation to unroll cable
- Counterweighted bottom arm for easy insertion in reel
- Side lifting eye allows reels to be put into a rolling or non-rolling position
- Repair kits available

HAND LINE TOOLS

3" Hand Line Block

Slingco's Hand Line Tools feature a 76.2mm (3") nylon fiberglass block, with a safe working load limit of 453.59 kg (1,000 lb), and a double locking snap with a safe working load limit of 2267.96 kg (5,000 lb).

Our 76.2mm (3") Hand Line Block's sheave can accommodate a 15.875 mm (0.625") diameter rope, and operates smoothly on the 12.7 mm (0.5") diameter axle and swivel bearings. The side opening feature allows quick access to remove the hand line.

The Hand Line Hook is made of manganese bronze, and is made for use with 12.7 mm (0.5") rope.

RUBBER BLANKET CLAMP PIN

Used to hold insulating blankets and other types of rubber coverups in place, the Slingco Blanket Clamp Pin is constructed of ultraviolet stabilized fiberglass reinforced polymer. Extra holes in the center of the body are used to grip conductors and prevent linehose from sliding. Holes have also been placed in the handles to enable attachment of warnings, tags, and/or flags. The handles of the pin are shaped to engage with the end ferrule of a clampstick (shotgun stick).

35KV JUMPER CLAMP

Slingco's Jumper Clamps are used as a part of jumper cable assemblies to bypass work areas when equipment is under repair or being upgraded. Jumper clamps are lightweight and impact resistant making them incredibly durable. We make inspection of the cable, ferrule, and clamp simple and easy via the transparent clamp body. The jaw of the Slingco Jumper Clamp and floating ring contact is made from a copper-based alloy.

Slingco Part No.	Main Line Range	Max. Continuous Amps	Threading	Length	Weight
ZSC09344	954 MCM (0.162 - 1.25)	400	5/8" - 11 threads per inch	11.5" (292mm)	2.5 lb (1.15 kg)
ZSC12110	477 MCM (0.162 - 0.9)	400	5/8" - 11 threads/inch	11.5" (292mm)	2.4 lb (1.09 kg)

NOTE: Slingco Jumper Clamps are sold individually. Slingco Jumper Clamps meet ASTM F2321 standard.

POLE STAND

Slingco's pole stand is lightweight and compact making it easy to place, remove, and store on your truck or jobsite. The support leg's swing-and-lock design make moving and storing the Slingco pole stand a breeze. The pole stand positions the pole at an optimal height for easy and safe framing. The pole stand's capacity of 6,000 lb makes it capable of handling the majority of wood distribution poles. Its curved cradle allows for safe rotation of the pole for proper framing positioning. The pole stand's high visibility and durability make it a proven choice for any work location or environment.

Slingco Part No.	Description	Capacity		Height		Width		Weight	
		lb	kg	in	cm	in	cm	lb	kg
TPE09682	Pole Stand	6,000	2,722	23.75	60.33	30	76.2	32	14.5

- Lightweight and compact
- Quick swing-and-lock legs
- Positions poles for safe and comfortable framing

POLE PULLER

DELUXE SYSTEM

Slingco's pole puller is a must have to comply with today's safe working practices, reducing the potential for boom damage and greatly reducing the potential of personal injury. The pole puller is easily assembled and disassembled. The standard pole puller system is composed of four pieces and the deluxe system six pieces. These configurations make the Slingco pole puller easy to handle and lighter weight than typical units on the market. The Slingco Deluxe Pole Puller system includes the pole puller pad and back plate weldment. The pole puller pad has studs which keep the base plate in the optimum position when pulling poles. The back plate weldment has angled teeth to increase hold on the pole during extraction. Slingco's pole puller offers a low point of attachment making it easy to remove even broken or cut poles.

Slingco Part No.	Description	Max. Operating Pressure	Recommended Flow Rate	Lift at Max. Pressure		System Total Weight

DIRT TARPS

Slingco's range of heavy-duty, re-usable dirt tarps have been created with safety in mind. Keeping workers out of awkward, injury-prone positions is better for their long-term health and the company's bottom line. Dirt tarps have become a must-have product at utility construction sites. You can find Slingco Dirt Tarps being used at pole change-outs, transformer terminations, pedestals, as well as underground gas, telephone, and other underground utility applications.

In fact, with the ability to move crushed rock, sand, dirt, wet cement, dig spoils, and other contaminated soil, there are few reasons NOT to have a Slingco Dirt Tarp on the project!

Slingco Part No.	Tarp Dimensions		Maximum Capacity	
	ft	m	lb	kg
ZLD10015	10 x 10	3 x 3	5,000	2,267
ZLD10016	8 x 8	2.44 x 2.44	5,000	2,267

ZLD10792	6 x 6	1.83 x 1.83	4,000	1,814

RATCHET CUTTERS (ACSR)

The Slingco ACSR Ratchet Cutter is designed to cut hard cables cleanly and smoothly. The ratchet design provides leverage, increasing cutting force with each open and close of the handles. Makes cutting cable easier compared to manual cutters.

The handles surfaces are designed to allow a firm, secure grip. The ratcheting action makes these cutters easy to operate even in limited spaces with just moderate pressure.

Do not use on energized lines.

- For cutting ACSR cable
- Smooth ratchet operation
- Cuts up to 954 ACSR and other hard cable cleanly

Slingco Part No.	Description
TCU09280	Hard Cable (ACSR) Ratchet Cutter

STAY WIRE DISPENSER

Slingco's Stay Wire Dispenser saves linemen time, effort, and keeps them safe. Efficiently dispense and take up excess stay wire from a permanently mounted source. Operation of the dispenser is kept smooth thanks to the high load sealed ball bearing. The Stay Wire Dispenser is constructed of high strength steel coated in a durable black and yellow finish to enable the unit to endure the harsh outdoor environment.

Easy to operate release knobs allow for quick and easy loading and unloading.

- Handles Stay Wire OD up to 1/2"
- Permanently mounts to truck or other surface
- Smooth pay-out operation thanks to high load sealed bearings

Slingco Part No.	Max. Wire Size		Coil Width Capacity		Coil Diameter Range		Weight	
	in	mm	in	mm	in	mm	lb	kg
ZWM09207	0.5	12.7	4.75	120	22-31	559-787	45	20.5

Slingco Part No.	Description
ZWM09741	Stay Wire Knob Replacement Kit - contains all parts needed to replace securement knobs

TRIPLEX DISPENSER

The Slingco Triples Dispenser is designed to be permanently mounted for the efficient dispensing of triplex. Slingco's triplex dispenser is designed to keep linemen safe while saving time and effort.

Constructed of high strength steel coated in a durable black and yellow finish allows the unit to endure the harsh outdoor environments. The high load sealed ball bearing keeps operation and rotation smooth.

Easily adjust break tension with a 3/4" wrench. Simple pull knob operation for loading of triplex coils.

Wire guide allows easy payout and rewinding of triplex.

Slingco Part No.	Coil OUTSIDE Diameter Range		Coil INSIDE Diameter Range		Coil Width Capacity		Weight

POLE LINE SUSPENSION CLAMPS

Slingco suspension conductor clamps provide safe and quick installation and removal of the conductor when attached to the insulator. A single fastener fully opens and closes the jaw. The clamps come in a variety of sizes to accommodate conductors from 0.16 to 1.50 inch diameter, and loadings of up to 18,000 lbs. To prevent loss, all moving parts of the clamps are captive.

Depending on size, the clamps are either made from heat treated aluminium alloy 356-T6 or ductile iron 60-45-15 and hot dip galvanised for corrosion resistance.

Slingco Part No.	Range (in)		Material	A		B		C		D		Load

THE SOLUTION APPROACH

HOW WE ARE DIFFERENT

We work with Utilities and Contractors through distributors to provide a cost-saving approach to Pole Line Hardware.

Instead of simply offering a range that's similar to what's already in use, we offer an equivalent to standards-compliant products, manufactured to the exact specifications you need.

This makes transition to the Slingco brand easy, but also gives standards engineers the opportunity to

work with us on new projects and designs.

Once the Pole Line hardware is approved, we keep the product in stock for immediate shipping whenever needed.

This is a new approach, already successfully introduced into other industries by Slingco, that we're now delighted to bring to the OHL and related markets.

10K DRIVE WRENCH ASSEMBLY

FOR EFFICIENT INSTALLATION OF SCREW ANCHORS

Our complete tool system for installation of screw anchors. The system consists of:

- Orange Drive Wrench (#SAE09639)
- Yellow Drive Wrench (#SAE08666)
- Drive Wrench Lock (#SAE10425)
- 2.5 in Hex Kelly Bar Adapter (#SAE10486)
- 2.625 in Hex Kelly Bar Adapter (#SAE10427)

Slingco's 10k Drive Wrench Assembly is a complete tool system for the installation of screw anchors.

Designed to connect the square anchor of a drive motor to the hexagonal Kelly Bar of a bucket truck, it comprises two Drive Wrenches to suit different sized anchor rods; a Drive Wrench lock; and two Kelly Bar Adapters to fit the most common drive bar dimensions (2.5 in and 2.625 in).

The Drive Wrench Lock attaches to the Kelly Bar Adapter and makes the installation of the Anchor Rod much easier. The three-position rings of the lock assembly ensure easy capture of the Drive Wrench and Anchor Rod, holding them securely while under torque and releasing them when needed.

The Drive Wrenches are designed to allow Anchor Rods to telescope inside, and secure to, the Drive Wrench Lock. The Drive Wrench transfers the torque from the Drive Motor to the Screw Anchor, and are rated to 10,000 ft-lbs.

HEX KELLY BAR ADAPTERS

Slingco's Hex Kelly Bar Adapters are a key component in the Drive Wrench Assembly. The adapters are used to connect the Drive Wrench Lock Assembly to the Kelly Bar of the bucket truck. There are two versions available which fit the most common drive bar dimensions.

Slingco Part No.	Kelly Bar Shape	Adapter dimensions						Weight each	
		X		Y		Z		lb	kg
SAE10486	HEX	2.5	63.5	4.25	108	8.25	210	16.3	7.39
SAE10427	HEX	2.625	66.7	4.25	108	8.25	210	16.7	7.57

DRIVE WRENCH LOCK ASSEMBLY

Slingco's Drive Wrench Lock Assembly attaches to the adapter and makes the installation of the anchor rod much easier. The three-position rings allow for easy capture of the Drive Wrench and the anchor rod, holding them securely while under torque, and releasing each when needed.

Slingco Part No.	Description	Weight	
		lb	kg
SAE10425	Drive Lock Assembly	18.4	8.35

DRIVE WRENCHES

Slingco's Drive Wrenches are designed to allow anchor rods to telescope inside them, and securing to the Drive Wrench Lock Assembly. The Drive Wrench transfers the torque from the drive motor to the screw anchor.

Rated to 10,000 ft-lb of torque, Slingco's Drive Wrenches are tough and can handle anchor installs in tough environments.

Slingco Part No.	Description	Hub Size		Shaft Size	
		in	mm	in	mm
SAE09639	10,000ft-lb Orange Drive Wrench	2.25	57	1.375	35
SAE08666	10,000ft-lb Yellow Drive Wrench	2.5	63.5	1.5	38

57 lb (28.85 kg) is the weight of each Drive Wrench

CATCHBLOCK OHL CATENARY ROLLER

The challenges faced by the OHL industry due to the growing number of infrastructure projects built beneath existing transmission and distribution networks - alongside increasingly stringent OHL regulations - can make maintenance costly, time-consuming and challenging. Lightweight, robust and easy to deploy, CatchBlock helps overcome these issues, increasing efficiency and reducing costs.

CatchBlock is an innovative overhead line (OHL) catenary roller system. Designed to deploy a two-rope system, it allows the recovery of broken conductors without the need to take possession of client/third party property or infrastructure.

Though the majority of off-the-shelf systems offer efficient single rope deployment, they frequently fail to meet the specifications required by third party clients who own property below overhead conductors. The CatchBlock system not only satisfies the most demanding requirements, but also - because it removes the need to close down essential infrastructure for conductor repairs or in the event of an emergency - its use means that estimating the costs of maintenance and refurbishment schemes is made far easier and more accurate.

KEY PRODUCT FEATURES

- Ropes are secured in position in the CatchBlock frame, avoiding the need for ferrules to be moulded or bonded to their outer surface
- Both ropes are tensioned simultaneously, hence the CatchBlock does not turn or flip
- Ropes are controlled to avoid build-up of slack in any sub-spans
- Both ropes are identical and have the same external marking to indicate where the CatchBlock is to be fitted
- One rope is contained in the main housing of the CatchBlock, the frame needs to be opened to allow the second rope to be installed

CONDUCTOR REPLACEMENT ROLLER

The Conductor Replacement Roller (CRR) provides a simple, conductor-deployed protection system using a lightweight aramid rope.

The CRR unit enables the safe exchange of conductors in three easy steps:

1. Laying out the pulling cable, e.g. with an electric pulling robot.
2. Tensioning the CRR Block assembly.
3. Feeding a new conductor through the cable pulleys of the CRR Block.

The CRR rollers have spring loaded gripping feature to secure the rope laterally without impinging any rotational movement as the rollers rotate around the axis of the conductor. Considerable effort has been made to reduce the complexity of the design to provide a simple mechanism to hold the rope and then connect around the conductor.

Designed for rapid deployment and secure connection the external locking mechanism can be inspected from ground level.

- 30% glass filled Nylon 6 from bespoke mould tooling
- Bespoke design incorporates aperture of 65mm to accept smooth passage of joints and connectors
- Type registered to industry standards
- Non conductive through use of insulating materials

CABLE PULLING GRIPS AND CABLE SUPPORT GRIPS

ASSESSMENT OF SUITABILITY

There are many factors that must be taken into account when assessing the suitability of a cable grip for a proposed application and trying to calculate a safe working load. These include:

- Size of cable grip in relation to size/shape of gripped object(s)
- Stability of object(s) when gripped
- Grip surface of object(s)
- Resistive force of object(s)
- Anticipated path of movement, including possible obstructions
- Approximate breaking strength of the cable grip
- Condition of cable grip
- Suitability and compatibility of any attachments used
- Environment / operating conditions
- Persons at risk

If you have any questions regarding suitability for any particular application please call the distributor who supplied the cable grip or our in-house Technical Department.

Please note: Slingco cable grips must be double steel banded securely before being pulled.

LATTICE DIMENSIONS

Lattice dimensions shown are as fitted to a nominal diameter of cable and prior 'free length' may be slightly longer than stated.

APPROXIMATE BREAK LOAD

This is the calculated average based on actual testing done by Slingco. Approximate break loads are quoted as a guide only.

TYPICAL CONFIGURATIONS

SAFE WORKING LOAD

Application load is normally calculated to be reduced by at least a factor of 5x the Approximate break load. Due to the wide variety of application parameters, the end user must apply a sensible safety factor to suit the safety requirements for the conditions of use.

The Safe Working Load (SWL) of a Slingco cable grip will depend on the Factor of Safety (FOS) applied to the Minimum Breaking Load.

FACTOR OF SAFETY (FOS)

Where the operational risk is considered to be normal, it is recommended that a FOS of 5 be applied, for a high risk operation a FOS of at least 10 should be considered. It is impossible to catalogue or guarantee a safety factor that will apply for all applications.

Approximate Break Loads stated on any certification, the recommended Factors of Safety, and any implied or stated fitness for purpose, are all only applicable when the cable grip is as new and unused.

A 20% variance in break loads must be allowed for when selecting a cable grip; a suitable swivel must be used if there is 'twist' in the cable.

Torsional stress must be dealt with when using grips for line pulls and wire splices. When twisting forces are present use a swivel that rotates under load to release torsional stress.

Cable Grip Safety Information

- Ensure that the cable grip mesh fits conductor correctly
- Ensure that the conductor fits up to the mid-point of the protective shoulder
- Clamp the ends of the cable grip when attaching the conductor. We recommend between 1 1/4" and 2 1/4" from the end of the cable grips
SECURE CLAMPING MUST BE USED ON SLINGCO CABLE GRIPS
- Never modify or attempt to repair any grip
- Ensure proper maintenance of the cable grip. If in doubt call 01706 855558
- Check the condition of the cable grip, and that it is the correct size for the intended application - do not exceed the rated capacity
- Grips that are worn, bent or otherwise damaged should not be used
- Grips are only to be used for temporary installations
- Pulling devices should only be attached via the pulling eye
- Cable grips must only be fitted and used by trained competent person(s)

SLINGCO CABLE GRIPS MUST NOT BE USED TO THEIR APPROXIMATE BREAKING STRENGTH. A SENSIBLE SAFETY FACTOR MUST ALWAYS BE USED. IF IN DOUBT CONTACT THE MANUFACTURER OR THE DISTRIBUTOR THAT SUPPLIED THE GRIP!

If you have any questions regarding suitability for any particular application please call 01706 855558

IMPORTANT TECHNICAL INFORMATION

SINGLE AND DOUBLE EYE CABLE GRIP INSTRUCTIONS

PLEASE NOTE: The condition of the cable grip should always be checked prior to use. The correct size of grip should always be used for the intended application. The rated capacity of the grip should never be exceeded. Grips that are worn, bent or otherwise damaged should not be used.

1 Select the correct grip for the diameter of the conductor.

2 Prior to use, the lattice at the end of the grip needs to be widened. This can be easily achieved by pressing the end of the grip against a hard surface, which causes the lattice to expand.

3 The grip should then be pushed over the end of the conductor...

4 ...and pushed over the conductor.

5 The grip then needs to be pushed along so that all the lattice is in contact with the conductor.

6 Once the cable grip is in place on the conductor, two clamps should be fitted to the end of the grip (as shown). We recommend between 1 ¼" (30mm) and 2 ¼" (55mm) away from the end of the cable grip.

7 Tape should then be wound around the end of the cable grip furthest away from the eye ends.

8 This will prevent the cable grip from snagging when in use.

LACE UP CABLE GRIP INSTRUCTIONS

PLEASE NOTE: The images shown here use double weave cable grips. When lacing single weave cable grips please use single wire lace; use double-laced for double weave cable grips; and use triple-laced for triple weave cable grips.

1 Start the lacing from the 'eye' end or anchoring end of the cable grip.

2 Thread the lace through the first two loops of the split and pull through until the laces are centered at this point.

3 Don't pull the lace too tight at this stage. Leave a space between adjoining loops roughly equal to the width of one diamond of the mesh.

4 Continue down the length of the cable grip. Try to maintain equal tension and equal spacing throughout as this leads to a more stable and equal grip.

5 As you continue down the length, pull the open sides of the grip as wide apart as required.

6 Try to achieve an even and neat lace-up as this assists with the strength of the grip when pulling.

7 Finally, tie the ends of the lace once or twice round the end of the cable grip twisting the ends together securely. Excess lace can be cut off.

8 Add any additional support as required – banding is recommended. The Slingco cable grip is now ready to use.
